was hobrobbing with a woman named Jeanette at that time according to Convict Allen. Allen further says: "I knew that Prait's name was Holmes all the time and I knew that he had five or six living wives. I traveled a great deal with him and we visited Hot Springs ingether. Springs together. Holmes had the most winning way toward women of any man I ever saw and he never mixed up with any that were not good looking. He was also mild-manered, courteous and affable toward men." In Philadelphia is Misz Georgia Yoke,

th Phitadelphia is Alisz Georgia Yoke, whom Holmes married in Denver in June, 1863. The worry over the trial of her husband has prostrated her and she is in a very precarious condition. Now the Georgia Mason with whom Frank Pratt of Wichita associated in Denver in June, 1893, has disappeared. Can they be the same women—this Georgia Yoke and Georgia Mason. Of course, if they are Holmes is Frank

But Mrs. Pratt, living in this city, eclares that up to December, 1892, she kept tab on her husband and it is not likely that between that time and April, 1833, he could have married five or six wives, which Allen the convict declares he had at that time. Then, again, the photographs of Pratt and Holmes are not alike, while appearing to be so, although the mustache now worn by fiolines and the difference be tween newspaper cuts and photographs might be a very good disguise. Farmer John Pulliam was not arraigned in Justice Jones court yesterday for kissing pretty Mrs. Wentz.

The trial was set for 4 o'clock in the atternoon but County Attorney Davis was absent and summons had not been issued to the witnesses in the case.

It was expected that Mr. Pulliam would plead guilty but it is claimed that his counsel, Judge Tucker, advised him to fight the case and he concluded to do it.

A half hour before the time set for the trial yesterday Justice Jones office was packed with people anxious to see the parties to the suit and hear their testimeny.

The Rock Island weather reports the rain all along their line in the day from El Dorado and up as far as McPherson.

There are no more loyal men to Kansas than the railroad employes. They rejoice when the town prospers and they are wild with delight when Kansas comes to the front with a crop of corn or wheat that knocks out all the other states.

This can all be accounted for by the well known fact that prosperity in the cities, towns and country means prosperity for the railroads.

Every railroad man wants his town and his division of the road to stand No. 1, in a business point and that desire makes every one of them loyal to the communities where they are located.

Harvey Hepburn of the Rock Island road arrived on the midnight train last night from Kingfisher and brought the news that the man killed at Sheredan last week is no other than Bill Doolin. When Mr. Hepburn was seen at the Santa Fe hotel, he said: "There is no doubt about it, Dick Willets is no other than the notorious Bill Doolin. I was at Kingfisher today when the body was exhumed and a perfect recognition made. The first rumor was that the body was that of Zip Wyatt, but I took pains to ascertain the facts. Sheriff Burehett of an adjoining county cam over on purpose to see the body and he told me with his own lips that it was that of Bill Doolin. The Pratt, (Kan.) Republican has the following.

The building committee of the Methodist church of this city, composed of Messrs. J. S. Barnes, M. F. Briggs, W. J. Brewster, A. E. Munch and I. E. Page, met last Tuesday night for the purpose of considering bids of contractors for the erection of a new church building on the lots where the old one was burned. Mr. Page was not present and after considering all the bids the committee decided to accept that

D. April 29, 1895.

The Sedgwick county normal now in session at the Lewis academy is one of the largest that has ever been held. From the present outlook it bids fair to go on record as the largest attended as well as the most profitable institute yet held in the county.

County Superintendent Charles J. Mackey is very enthusiastic over the classes are thoroughly graded, the attendance good and the teachers and pupils interested in their work.

The instructors, who are of the highest ability, have so arranged their work that each has his special classes. Among the instructors are Prof. J. M. Naylor, who has charge of the classes in history, natural philosophy and didactics; Prof. R. S. Lawrence, arithmetic, eivil government and physiology; Prof. O. W. Jones, geography, orthography and grammer; Prof. E. H. Robbins bennmanship and bookkeeping; Prof. G. W. Hoss, elecution and reading; and Miss Carrie Shults, kindergarten.

The ground that has been overed so far embraces the first lessons in orthography and treat of articulation, its errors and how to overcome them:

graphy and treat of articulation, its errors and how to overcome them; sounds, and discritcal study. Under geography special stress has been laid on local typography and many object lessons are introduced. Good work has also been done in the history, phys ology, pennmanship and kindergarten classes. Miss Shults being acknow-edged one of the foremost instructors in the last named department. Taking it altogether the students, as

well as the teachers, are satisfied that the results to be obtained from this ses slon will be remembered with more pleasure and result in more benefit than any meeting hertofore held.
